Books

Button Books is an exciting list of innovative and design-led books aimed at educating and inspiring young minds. Bright and appealing flash cards, board books and interactive activity books will appeal to new readers, while older children can learn about important scientific, geo-political and historical subjects. There is also an exciting new range of manga-style illustrated graphic novels. As well as incorporating hard-working and informative content, the beautiful illustrations combine with high production values, to make each title a gorgeous addition to any child's bookshelf or school library.

Button Books is an imprint of **GMC Publications Ltd.**

Outdoor Survival Skills

A Handbook for Young Adventurers

Naomi & Dan Walmsley, illustrated by Joshua Rice

Children can learn fantastic practical survival skills in this compact but comprehensive handbook. Ranging from basic first aid, lighting a fire and foraging to making soap, a bow and arrow and a hammock, this is a valuable aid for helping kids to be independent and resourceful, whether they set up camp in the backyard or in the wilderness.

Naomi Walmsley and Dan Walmsley specialise in providing bushcraft and Stone Age skills for school children and teachers at their woodland in Shropshire. Both are qualified bushcraft instructors and Naomi is a Forest School Leader.

GMBUT-51254

100 Forest School Activities

Naomi & Dan Walmsley

This lively collection of outdoor activities is an essential guide for connecting with the natural world, whatever the weather. Packed with ideas for primary schoolers to teens, there are projects for rainy days, imaginative outdoor games, bushcraft basics, gloriously messy crafts and activities to increase children's awareness of nature. Through controlled risk taking in a natural environment, it improves children's confidence and self-esteem while boosting their social skills and resilience. It's also the perfect antidote to too much screen time and classroom-induced fatigue.

Kids Can Cook Around the World

A Tasty Tour of Global Cuisine

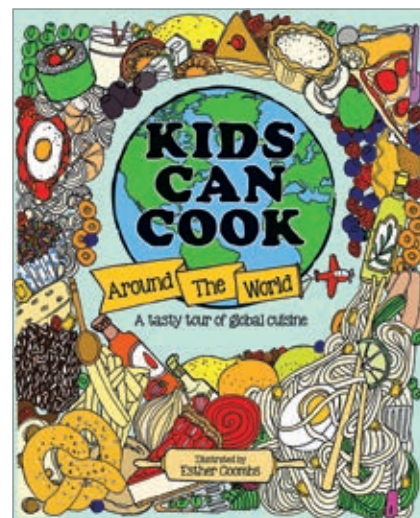

This beautifully illustrated step-by-step recipe book shows children how to make favourite foods from around the world. As well as finding out how easy it is to make lots of delicious things to eat, they'll practise skills like measuring, weighing and counting without even realising it. A basic techniques section explains how to prepare ingredients, use equipment and know when your culinary creation has been cooked to perfection. Every recipe uses readily available ingredients, and the simple instructions are illustrated with colourful drawings, showing each stage of the process. Throughout the book, you'll find handy tips for storing your dishes, recipe variations to try, and clever kitchen hacks to improve and enhance your skills. Packed with recipes for everything from poutine to pavlova, to biryanis and bao buns, to ramen and risotto, this is a culinary world tour designed to expand kids' palates and cooking skills.

Moving to Mars **RIGHTS RESTRICTED**

Building a Colony on the Red Planet

Eduard Altarriba, Sheddad Kaid-Salah Ferrón, Guillem Anglada Escudé, Miquel Sureda Anfres

Ever since the first rocket was launched into space, we've dreamed of one day setting foot on Mars. Now that dream is set to become reality, with organisations planning to send astronauts to Mars within the next decade. But why stop at traveling to Mars – could we really build our own cities and live on the planet? *Moving to Mars* is a fascinating and informative exploration into how future generations could call Mars home. Based on the latest scientific research, this book will take you on a journey that is out of this world.

Future Vision

Stories of Our Brilliant Tomorrow

Dr Cathy Rogers & Madeleine Rogers

Children are taken on a journey into the year 2070, to a world transformed by technology, sustainability, and global initiatives. From traffic-free cities and carbon-free energy to eco-friendly homes and developments in space exploration, readers are invited to imagine the possibilities that lie ahead. Written as a positive exploration of life in the future, the book aims to inspire children to dream of the bright future that they can help create.

Dr Cathy Rogers began her career in TV, as a creator and producer of science programmes, including the Emmy-nominated *Scrapheap Challenge*. She returned to academia for a PhD in Educational Neuroscience, looking at how creativity works in the brain and has since written a book for teachers about how brains work.

Madeleine Rogers' background is in illustration, graphic and product design. Recently graduated with an MA in Sustainable Design, her practice is focused on communicating wonder and awe for the natural world to young audiences.

Communication **RIGHTS RESTRICTED** How We Connect and Exchange Information

Eduard Altarriba and Meli

All animals communicate with each other in one form or another, but humans are unique in that we have been able to go much further, creating languages and symbols to share and explain ideas, feelings and abstract concepts. Communication has allowed us to make breakthroughs in science and convey emotions through art and music, and in order to communicate faster and farther, we have created technologies ranging from writing to the Internet. Almost everything we do during the day is a form of communication – not only when we speak, listen, read or write, but also when we see road signs or read each other's body language. This beautifully illustrated book tells the story of communication in all its many forms, from ancient times to AI.

Castles

Factology: Castles takes you over distinctly whiffy moats and beyond the battlements into the hothouses of medieval history. At their height, these magnificent, fortified homes were at the centre of major world events and packed to the turrets with life. Rulers used their castles to defend territory, stash their riches and house their friends and family. To do that they depended on knights and soldiers, and they also needed an army of servants, cooks and all kinds of craftspeople to maintain their cushy lifestyle. So, join us as we lower the drawbridge and usher you into the exciting, frightening and frequently strange world of castles.

1066: The Battle of Hastings

A Graphic Novel

Stuart Douch

1066 is one of the most famous dates in the history of the nation: the year of the Battle of Hastings. It was a key turning point in the nation's history, marking the end of the Anglo-Saxon era and the start of the Norman period. This graphic novel tells the story of what happened before, during and after this iconic battle. Discover all the details surrounding the story, from the mistakes and decisions that meant William of Normandy became the first Norman king of England to how Harold was killed – was it by an arrow in the eye?

GREAT LIVES IN GRAPHICS

The **Great Lives in Graphics** series is a fresh approach to looking at the lives of famous and influential people. It takes the essential dates and achievements of each person's life, mixes them with lesser-known facts and trivia, and uses infographics to show them in a new and visual way that is genuinely engaging for children and young adults. The result is a colourful, fascinating and often surprising representation of that person's life, work and legacy. Using timelines, maps, repeated motifs and many more beautiful and informative illustrations, readers learn not just about the main subject of the book but also about the cultural background of the time they lived in.
